PROJECTS

Mass Email

This website enables users to dynamically create, update, and delete campaigns in English and French. The user-friendly interface allows for easy customization of campaign content, including titles, descriptions, and multimedia assets. The website seamlessly switches between languages, empowering users to create campaigns in their preferred language. The project focused on user experience, performance, and security, resulting in an intuitive platform for effective communication with diverse audiences in both languages.

Technologies : Angular, Tailwind CSS, HTML

Explicit Cars

Led the development of a web application for buying and selling second-hand cars. Implemented advanced search and filtration features based on price, model, brand, and year of manufacture. Integrated with MongoDB for data storage and retrieval. Enabled image and video uploads to enhance the user experience. Utilized Amazon S3 for secure storage and retrieval of car media. Implemented user authentication and authorization.

Technologies : React js(Admin Panel), Next js(Front end), Tailwind, HTML

Foodgienic

Developed a web application using React and Node.js for online food ordering and delivery allowing users to explore and order from various restaurants. Integrated with Node.js and Postgres for data storage on the backend to handle user requests and process orders. Enabled restaurant registration, allowing new vendors to showcase and sell their food products and Implemented an intuitive user interface using React for a seamless browsing and ordering experience.

Technologies : Next js, Tailwind
